# UC BERKELEY CENTER FOR LONG-TERM CYBERSECURITY
# CLTC VISITING SCHOLAR PROGRAM

*Helping people anticipate and address tomorrow's information security challenges, in order to amplify and extend the upside of the digital revolution.*

## Collaborate with us to advance cybersecurity research

CLTC hosts a limited number of national and international visiting scholars who wish to spend at least six months in residence at UC Berkeley and who are interested in working collaboratively with CLTC and Berkeley researchers.

CLTC will consider proposals in all domains, disciplines and types of expertise and knowledge relevant to cybersecurity. We are particularly, but not exclusively, interested in proposals that bear on these four areas:

- Security Implications of Artificial Intelligence and Machine Learning
- Human Capital and Talent Pipeline for Cybersecurity
- New Cybersecurity Governance and Regulatory Regimes
- Protecting Vulnerable Individuals and Organizations Online
- Culture and Dialogue of Security
- Data Science and Cybersecurity
- Human-Centered Security

## PRIVILEGES

- Reserved desk in the CLTC co-working space
- Access to shared CLTC conference room space
- Shared communications support for publication and dissemination of research
- Relationship with School of Information and cybersecurity research community at Berkeley
- Invitation to CLTC private events
- **Campus benefits and privileges**, including University library access and Berkeley email and ID

## EXPECTATIONS

- At least 1 public-facing product under the CLTC affiliation (e.g., white paper, op-ed, seminar)
- Engagement with CLTC research staff on work-in-progress; advice and counsel on internal CLTC research projects
- Be a CLTC ambassador at your institution and within your other networks
- Visiting Scholars are encouraged to participate in CLTC and other campus programs, which include a variety of talks, seminars, and conferences that are open to attend throughout the academic year
